Anti-Climb Vertical Guardrail

Quick Emergency Release Gates

Pictorial Decals

New Swivel Castors

Updated Operators and Maintenance Manual

Relocated Emergency Lowering Tool

Powder Coated Steel Platform

Benefits

- Pictorial Decals and Updated Operators Manuals: Allows non-native language speakers to better understand guidance.
Makes machine spec changes much easier and cost effective.
- Steel Powder Coated Platforms Tray & Step: Cost to manufacture machines reduced along with reduced environmental impact from extracting raw aluminium compared to steel.
Additional colour customisation option for customers.
- New Swivel Castors: Much smoother & silent manoeuvrability of machines on hard, level ground
Tested to be significantly more durable compared to previous versions.

Benefits

Continued

Vertical Hand Rails:

Prevent operators from using the guardrails to climb higher than machine allows. *Doesn't affect SWL of machine compared to aftermarket methods.*

Significantly easier to remove and refit entire hand rails in one piece, saving time on large repairs.

Quick Emergency Release Gates:

Allows effective emergency recovery of incapacitated operator when Vertical Hand Rails are fitted by allowing the Gates to be quickly removed.

Relocated Emergency Lowering Tool:

Operators are less likely to unintentionally damage tool and will reduce ordering of the replacement part, saving downtime of equipment.
